

COMMERCIAL LAUNDRY SYSTEMS

LAUNDRY LOUNGE

Better living through enjoyable laundry service.

Why LG Commercial Laundry?

Sturdy & Long Lifecycle

Premium Powder Coating

Inverter Direct Drive™

Gyro Balancing System

Efficiency & Energy Friendly

Space Saving

Atomizing & Twin spray

10° Tilted Drum

Convenient Install & Maintenance

Tub Clean & Waveforce

Installation Flexibility

Auto Dosing Systems

Premium Powder Coating

Our powder coated finish creates the same durability as it does when painting a car. It is sure to last long and provide an easy to clean exterior.

Inverter Direct Drive™

Unlike the traditional belt & pulley system, the LG commercial laundry drum is directly attached to the motor, providing superior durability.

Gyro Balancing System

LG Gyro Balancing System provides optimized performance through advanced algorithm.

Space Saving

The small cabinet size with bigger washing capacity and stackable design allows more customers and more machines in limited space.

Atomizing & Twin spray

The Atomizing nozzle sprays fresh water onto the clothes and the door, providing rapid water supply. Twin Spray circulates soapy water, increasing wash performance and water visibility.

10° Tilted Drum

Water Saving 10°

LG's commercial washer tub is tilted 10°. It enables the washer to have higher water level compared to competitors.

Tub Clean & Waveforce

A dirty tub from hours of long operation can affect washing performance. Our tub cleaning program helps you keep a clean tub even in the busiest locations.

Installation Flexibility

Install laundry machines to meet your needs, with side by side or stacked configurations. The units are easy to move and reinstall in new locations.

Auto Dosing System

Simple to connect automatic detergent/chemical injection system.

*Autodosing Pump (Purchase Separately)

Why LG Commercial Laundry?

Sturdy & Long Lifecycle

1 Premium Powder Coating

Our powder coated finish creates the same durability as it does when painting a car. It is sure to last long and provide an easy to clean exterior.

2 Inverter Direct Drive™

Unlike the traditional belt and pulley system, the LG commercial laundry drum is directly attached to the motor providing superior durability and reliability. Fewer parts equals fewer repairs.

- Motor directly attached to drum
- Quiet operation with little vibration
- Excellent durability due to brushless motor and lack of belt and pulley
- High-tech design and manufacturing

DD Motor + Drum

3 Multi Heat Treatment

To ensure superior performance, LG Heat-Treats the shaft which connects our drums and motors. This protects against gradual wear and tear.

4 Gyro Balancing System

LG Gyro Balancing System provides optimized performance through advanced algorithm, which allows for errorless spin entry and on time cycle completion.

Why LG Commercial Laundry?

Efficiency & Energy Friendly

1 Space Saving

The small cabinet size with bigger washing capacity and stackable design allows more customers and more machines in limited space.

2 Atomizing & Twin Spray

The Atomizing nozzle sprays fresh water onto the clothes and the door. This helps produce a rapid fill so clothes are soaked sooner and longer providing a better washing performance. It also cleans the door glass every time the water sprays on it, reducing your burden of cleaning any excess soap residue. Twin Spray circulates soapy water, increasing wash performance and water visibility.

1) Simultaneous atomizing spray, rinse spin, and drain for quick rinsing

3 10° Tilted Drum

LG's commercial washer tub is tilted 10°. It enables the washer to have higher water level compared to competitors. This allows us to use less water while not sacrificing superior wash performance.

PRODUCT INFORMATION

Convenient Install & Maintenance

1 Installation Flexibility

3 Auto Dosing System

2 Tub Clean & Waveforce

1 Installation Flexibility

Install laundry appliances to meet your needs and your location, with side by side or stacked configurations. The units are easy to move and reinstall in a new location.

2 Tub Clean & Waveforce

A dirty tub from hours of long operation can affect washing performance. Our tub cleaning program helps you keep a clean tub even in the busiest locations.

3 Auto Dosing System

Simple to connect automatic detergent / chemical injection system, so there is no need to manually put in detergent for every wash.

*Autodosing Pump (Purchase Separately)

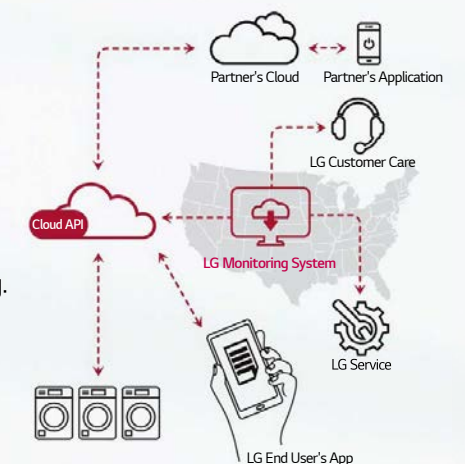

4 LG Smart Solution

Streamline maintenance

View status and error codes anytime and anywhere.

Maximize profit

Set and tweak prices based on patterns and targeted timing. Set special pricing for peak business hours.

4 LG Smart Solution

FAQ

- Q1** Which coin drop brands are compatible and is the coin drop included in the box?

A1 Coin drop is not included; you can buy and use Greenwald, ESD and Munzuprufer with our product.
- Q2** How often do I need to perform maintenance?

A2 Locations with high temperature and humidity, extreme detergent use, or dusty environments will require more frequent maintenance. For a more detailed recommendation, inquire about the Maintenance Guide.
- Q3** Can I have the machines delivered already factory stacked?

A3 Machines must be stacked on site. But stacking is very easy. This also allows you to use stackable machines unstacked by swapping out parts.
** Titan-C Dryer is stacked in the factory.*
- Q4** How do I stack the machines?

A4 Using the stacking kit (provided with Upper dryer), attach the 2 stacking brackets on the top plate of the bottom machine. Remove the legs and their brackets on the Upper dryer, then attach the 4 sliding pads. Place the dryer by fitting the pads into the slots of the stacking brackets. Secure the Upper dryer by attaching the back bracket.
- Q5** Is it possible to convert machines from payment to non-payment or vice versa?

A5 You can select Payment type (Coin or Card) and Non-Payment type (On Premise Laundry) in Setup mode.
- Q6** Can I connect LG commercial machines to a detergent system?

A6 The Titan-C and Giant-C Pro models are ready to connect with a detergent system. To connect Giant-C+ models, you need to drill the holes in the back of the cabinet and the dispenser to connect with a detergent system.
